

With having gained extensive knowledge from having worked in award winning breweries to realestate & apartment maintenance, Lime electrics has the experience and knowledge to understand what clients are after in this social media age.

**If we can't fix it, it's free**

With the extensive knowledge gained from working in real estate and apartment maintenance, there isn't a problem we haven't seen, and if there's something we're unable to fix, it's free.

**Clean & tidy**

We like to leave everything as clean and tidy as we've found it so that our clients only notice the work we've carried out and not the mess we've left behind.

**Flexible working hours**

We understand not everyone likes to leave a tradesman alone in their property, which is why offer some flexibility with our hours on the weekend and charge at normal rate. Additionally we still offer 24hr emergency support.

**Communication**

We understand communication is key to running a successful business and so we will ensure that all parties are kept informed as to how the job is progressing and what the next steps are.

**Punctual**

We understand there is nothing more frustrating than wasting all day waiting for a tradesman who never turns up, which is why we aim to be at an appointment when we say we will. If for some unforeseen circumstance we will be unable to attend at the arranged time we will provide the tenant with ample notice.

We provide a vast array of electrical services but not limited to;

- Fault finding
- Repair and replacement of electrical equipment
- Installation & repairs of socket outlets
- Repairing & installation of phone & data connections
- Oven repairs
- Repair & replacement of light fittings/switches
- Electrical safety inspections
- Installation & testing of RCD's
- Switchboard upgrades & repairs
- Reconnect/ disconnect & change elements of hot water systems
- L.E.D lighting upgrades
